

Job Description

Senior Frontend Developer (React.js)

Company: TechNova Solutions

Location: Remote / Hybrid

About the Role

We are looking for a Senior Frontend Developer with strong experience in React.js, TypeScript, and modern web technologies. The ideal candidate will collaborate with product managers, designers, and backend engineers to build scalable and user-friendly applications.

Responsibilities

- Develop and maintain web applications using React.js and TypeScript.
- Build reusable UI components and design systems.
- Optimize applications for maximum performance and scalability.
- Integrate REST APIs and GraphQL services.
- Collaborate with cross-functional teams to define and implement new features.
- Participate in code reviews and mentor junior developers.
- Write unit and integration tests using Jest and React Testing Library.
- Ensure responsive design and cross-browser compatibility.

Requirements

- 4+ years of experience in frontend development.
- Strong knowledge of JavaScript, TypeScript, HTML5, and CSS3.
- Experience with React.js, Redux, and Next.js.
- Familiarity with REST APIs and GraphQL.
- Experience with Git and CI/CD pipelines.
- Understanding of software engineering best practices.
- Excellent communication and problem-solving skills.

Preferred Qualifications

- Experience with AWS or Azure.
- Knowledge of Docker and Kubernetes.
- Experience working in Agile/Scrum environments.
-

Self Decription

Hello, my name is Rahul Sharma. I am a Frontend Developer with around 3 years of experience building responsive and user-friendly web applications.

My primary expertise is in React.js, JavaScript, TypeScript, HTML, and CSS. In my current role, I develop reusable UI components, integrate REST APIs, and work closely with backend developers and designers to deliver high-quality products.

I have experience using Redux for state management and have worked on projects involving authentication, dashboards, analytics, and e-commerce features. I enjoy solving complex problems, improving application performance, and writing clean, maintainable code.

Recently, I have been learning Next.js, Docker, and cloud technologies to expand my full-stack development skills. I am passionate about continuous learning and enjoy collaborating with teams to build impactful products.
